Lesson 2. Setup SDL in Dev-C++

Code Signing Certificates
Code sign your software without Overpaying - Code Sign your Software.
ksoftware.net

This lesson is very important , because many people failed in here.
Please follow the steps to setup SDL in Dev-C++.

Step 1.

Open Dev-C++ -> Tools -> Compiler Options
Check the box and add in these parameters exactly :
-lmingw32 -lSDLmain -lSDL

That's "dash L" not "dash one". You can just copy & paste in your Compiler Options.
You'll get "Linker Error" if you fail in this step.

Lesson 9. Organize The Program II
Lesson 10. Load a GIF image file
Lesson 11. Using SDL_ttf for TrueType Font
Lesson 12. Impact Detection
Lesson 13 Hidden Bug In A Program
Lesson 14. Create An Object In A Game
Lesson 15. Shoot A SDL_Rect Bullet

SDL Example

Simple Case

Exp1. A Multiplication Table
Exp2. Drawing A Mathematical Formula
Exp3. The Tracks By A Moving Object
Exp4. Drawing a Differential Equation

SDL Application

Exp1. Low Pass Filter Simulator
Exp2. WebServer - Using SDL_net
Exp3. Webcam - Using SDL & OpenCV
Exp4. Physics Simulation - Diffusion
Exp.5 3D Stereogram

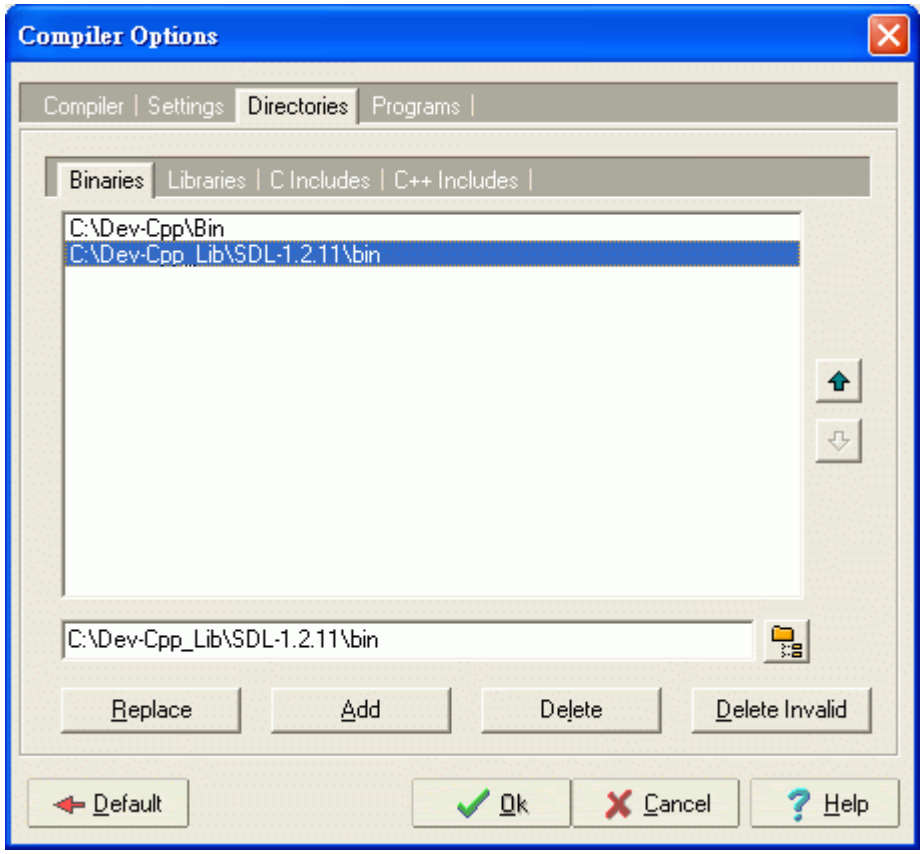
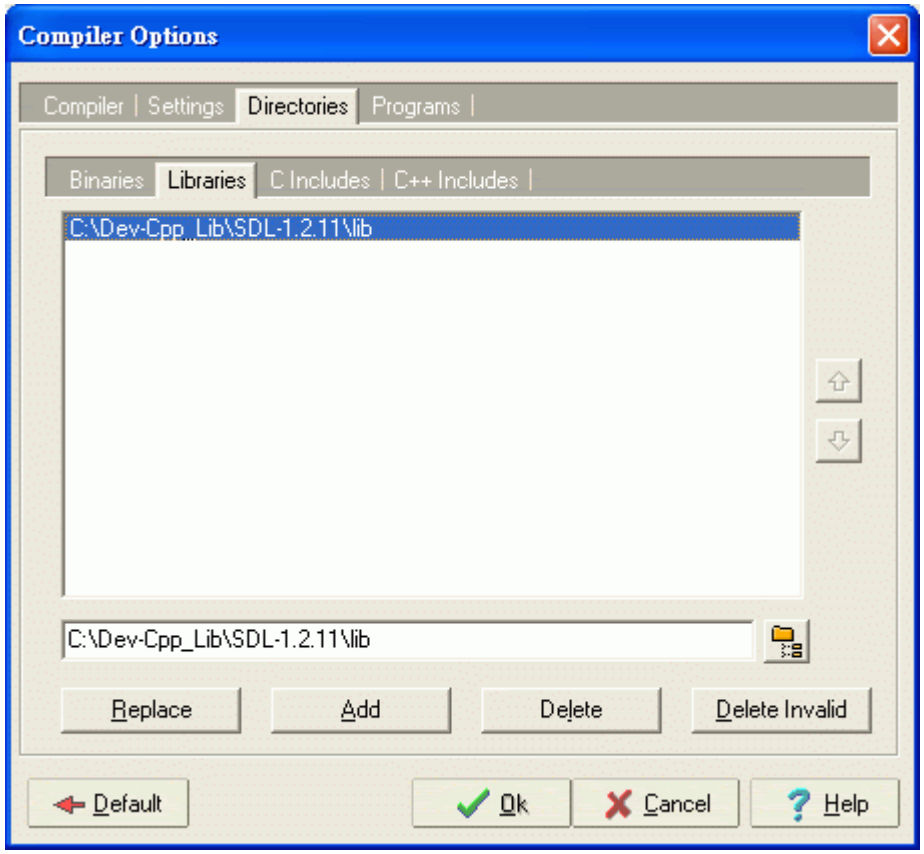
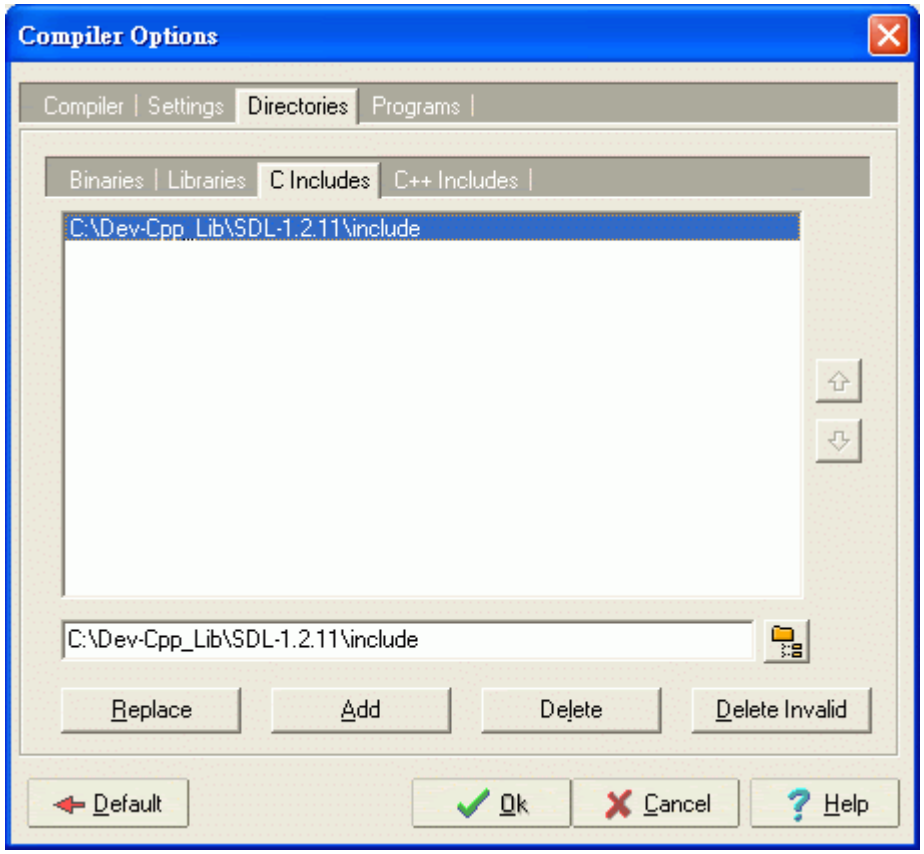
Step 2.
Select "Directories" & assign the bin file directory of SDL for it.



Step 3.
Select "Libraries" & assign the lib file directory of SDL for it.



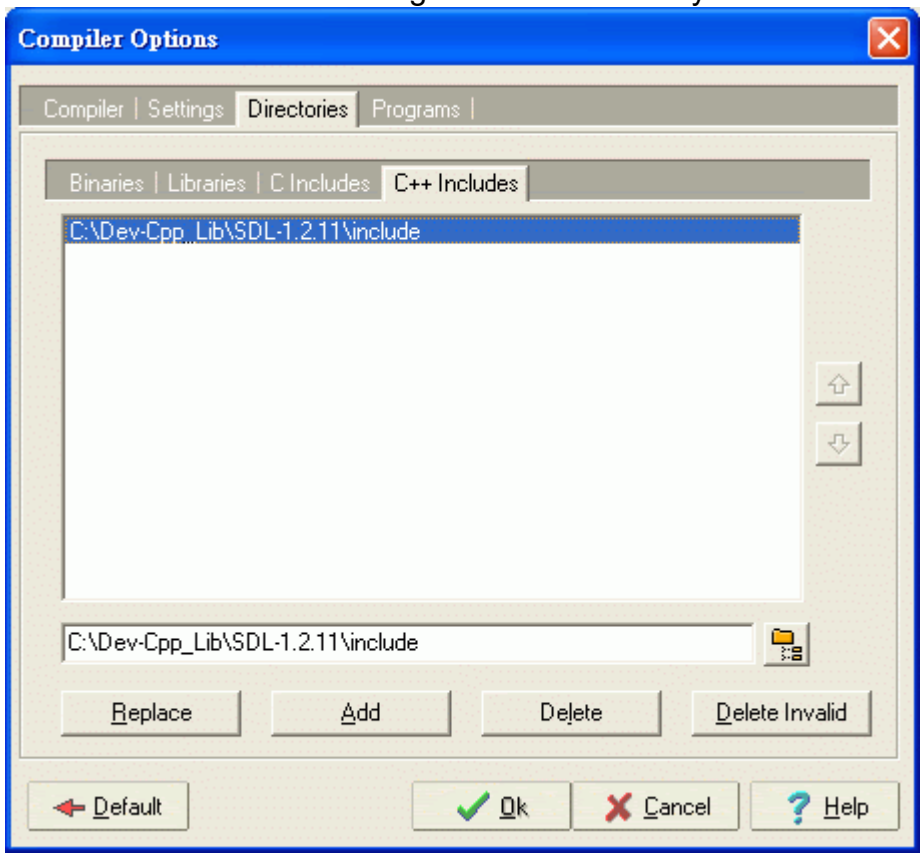
Step 4.
Select "C Includes" & assign the h file directory of SDL for it.



Compiler Options
Compiler | Settings | Directories | Programs |
Binaries | Libraries | C Includes | C++ Includes |
C:\Dev-Cpp_Lib\SDL-1.2.11\include
C:\Dev-Cpp_Lib\SDL-1.2.11\include
Replace
Add
Delete
Delete Invalid
Default
Ok
Cancel
Help

Step 5.

Select "C++ Includes" & assign the h file directory of SDL for it.



Click on Ok , then the setup is done !
